

WOOD QUIRKING WEEKLY

THIS WEEKS PROJECTS

A Timely Repair

Not every job needs a full restoration. Sometimes it's the small repairs that make all the difference.

This week Dan worked on a grandfather clock that came in for a simple hinge repair to ensure the door was working as it should. A small fix, but an important one for keeping this beautiful piece looking its best and preserving it for years to come.

The Mahogany Marathon Continues

Yes, it's still here... this wardrobe really is a big job!

We're making steady progress, slowly working through each stage and giving this beautiful piece the time and attention it deserves.

A BIG BIRTHDAY CELEBRATION

We had a special reason to celebrate recently as Oliver, Nick's grandson and Dan's nephew, turned 18!

We took some time away from the workshop to celebrate this exciting milestone with family and wish him all the best for this next chapter.

We are so proud of you and can't wait to see what you do next!

A FRESH LOOK FOR WOOD QUIRKING

As you could probably tell, we've been making a few changes behind the scenes... We're excited to officially announce that Wood Quirking is getting a bit of a rebrand!

When we first started, the original colours, logo and designs were always intended to be temporary while we got everything up and running. They helped us get our name out there, but now we feel it's time for something that better represents who we are and the quality of the work we create.

We've introduced a new colour scheme and a brand-new logo that we feel captures the character of Wood Quirking — combining our love of traditional, quality craftsmanship with a more modern and recognisable look

There's still a bit of work to do, including updating our website to match the new look, so please bear with us while we make the changes. We're looking forward to bringing everything together and creating a brand that feels much more "us".

Thank you, as always, for following along with our journey and supporting our business. We can't wait to show you what's next!
